Subject: Follow up re. Shorewood LSLs
Date: Tuesday, February 06, 2018 2:25:26 PM

Alderman Murphy,

In Finance and Personnel last week, you asked about the number of LSLs in Shorewood and how they are managing them.

Their DPW Director indicates:

- They have about 3,000 LSLs.
- For the past 15 years, they have replaced the public side as they have replaced the water mains
- Since 2016, they have offered owners the option to have the private side replaced by the city contractor at 100% owner cost.
- 0 participated in 2016 and 1 participated in 2017.
- They do not have an ordinance mandating replacement.
- Current policy is to replace the public side when there is a public side leak (no repairs).
- If the owner replaces the private side, Shorewood replaces the public side
- No cost sharing or subsidy is available.

I hope this is helpful,
Jennifer
