Subject: RE: GHG Workgroup update

Hi Barb and All,

Regarding WE Energies, I think we need Eric's thoughts on how best to deal with them based on his experience to date. But I love the idea of inviting them to a Task Force meeting to discuss matters like providing the data we need to do as accurate an inventory as possible followed by regular tracking of progress.

Subject: Re: GHG Workgroup update

Hi all, As you will see from the email just sent a bit ago I am asking that we set a

- Priority 2: reaching out to Neighboring Municipalities (see letter Document);
- Priority 3: engaging WE Energies: Invite to present to the Taskforce as we did Eric for ECO and Gordie for County; Invite sharing of data - perhaps the consultant could do that? or should the Taskforce, or Work Group?

Thanks all,

Peace, Barbara

Hi everyone,

Thanks to everyone for coming to the meeting on Tuesday or otherwise providing comment. Here's a summary of what we discussed:

- Platform: ICLEI Clear Path
- Scope: Priority 1 is community emissions for the geographic boundary of the City of Milwaukee, including Milwaukee County operations therein. We will get pricing from the consultant for doing all of Milwaukee County's geographic boundary as Priority 2 if the budget allows; We will be looking at Scope 1 and Scope 2 emissions, not Scope 3. We will get the price for adding solid waste to the measurement as well, and get more information on how trees factor in.
- Consultant selection: We will move forward with discussions with AECOM, working off an existing City contract. The consultant we will potentially be working with is named Joshua Lathan. We will try to document the methodology so that we can have local people update the inventory as needed

I spoke with the AECOM team after the meeting. Joshua is not available to start work until the middle of January; however, we will start getting pricing. Josh confirmed that it will be difficult to complete a GHG unless we get the right data from our utility.

Please let me know if I missed anything. I appreciate your thoughtful involvement on this.

Erick

Attachments: Global Compact of Mayors Reporting Framework.pdf

Hi All,

Quick question about the inventory we have in mind. I know the City had at some point signed off on the Global Covenant of Mayors climate commitment. They have a common reporting framework for emissions:

<https://www.globalcovenantofmayors.org/our-initiatives/data4cities/common-global-reporting-framework/>

Details for the framework are attached. Note that it includes vulnerability/adaptation reporting which I know might be down the line for Milwaukee.

Is this something we'll be asking the consultant to consider aligning with?

Ted
