

City of Milwaukee 2019 Police Satisfaction Survey

Research goals

Measure resident perceptions regarding:

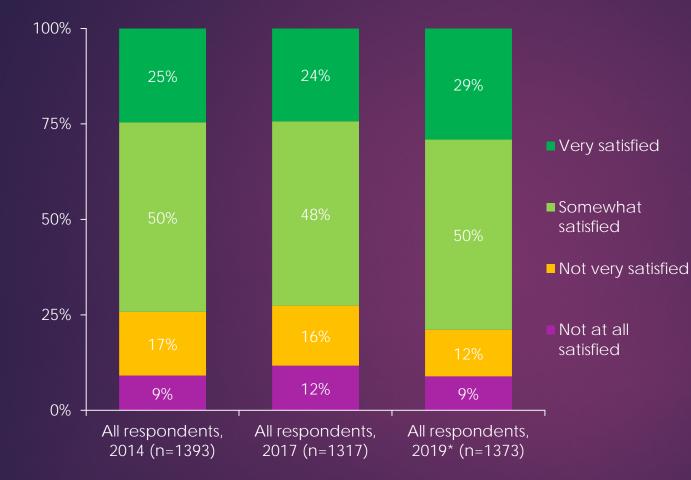

- Satisfaction with and trust in the Milwaukee Police Department
- Perceptions or safely and police visibility
- Views on various kinds of police contacts
- Exposure to crime
- Differences across various groups of Milwaukee residents
- Differences across geographies (police districts & aldermanic districts)
- Changes over time

Methodology

- RDD telephone survey of Milwaukee residents aged 18+
 - Administered by the Strategic Research Institute at St. Norbert College
 - Landlines and mobile phones
 - Survey conducted in English and Spanish
- ▶ Field period: 8/14/2019-1/17/2020
 - ► 1,373 completed interviews
 - ▶ 4.3% response rate
 - +/- 2.6% margin of error (95% confidence level)
 - Results were weighted by age, sex and race in accordance with AAPOR best practices
 - Population values for Milwaukee were drawn from the U.S. Census Current Population Survey

Overall satisfaction with the Milwaukee Police Department

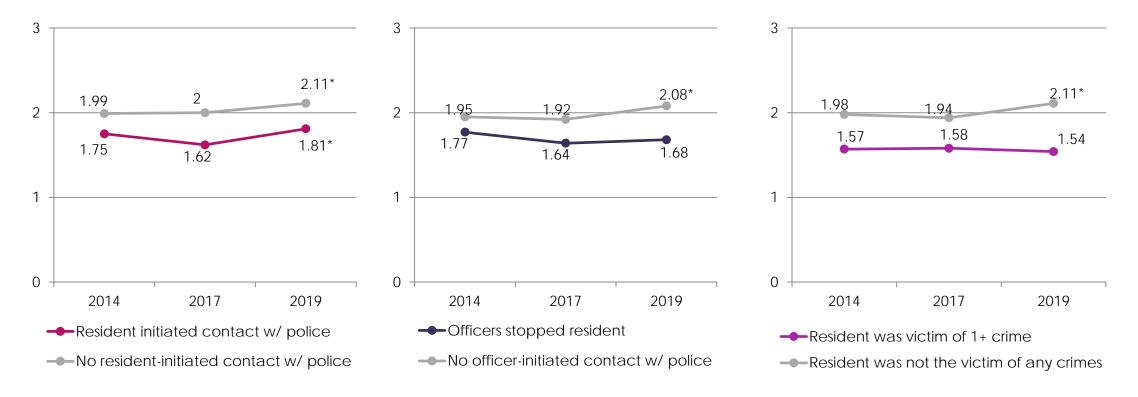

Differences in satisfaction, by experiences with police and crime

Change in satisfaction over time, by experiences with police and crime

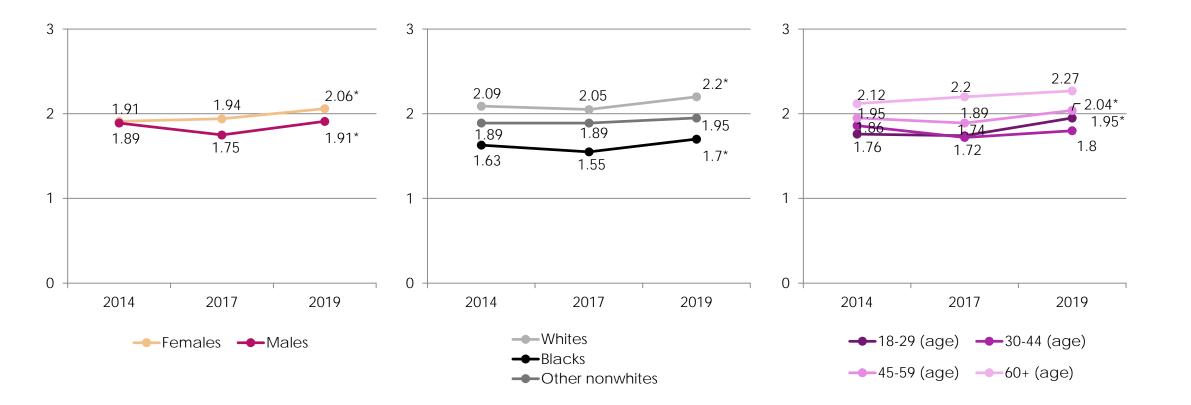

Differences in satisfaction, by demographic groups

Change in satisfaction over time, by demographic groups

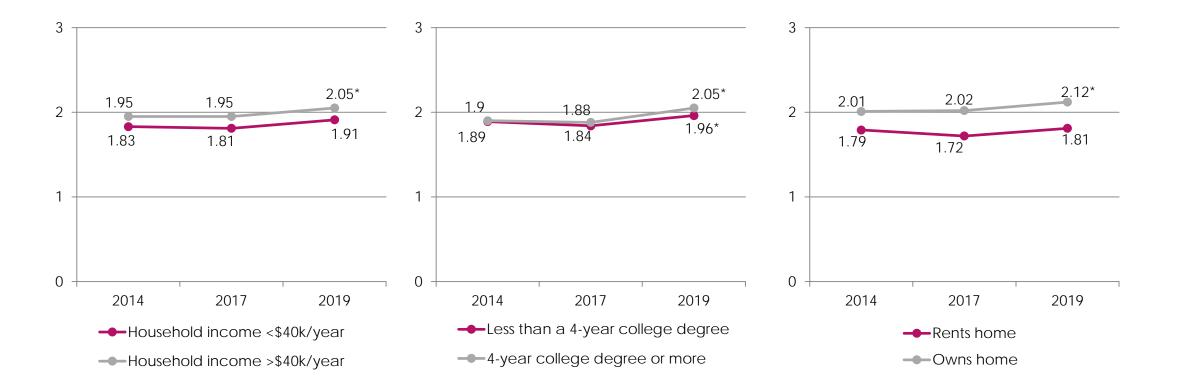

Differences in satisfaction, by socioeconomic categories

Change in satisfaction over time, by socioeconomic categories

What is driving the change in aggregate overall satisfaction?

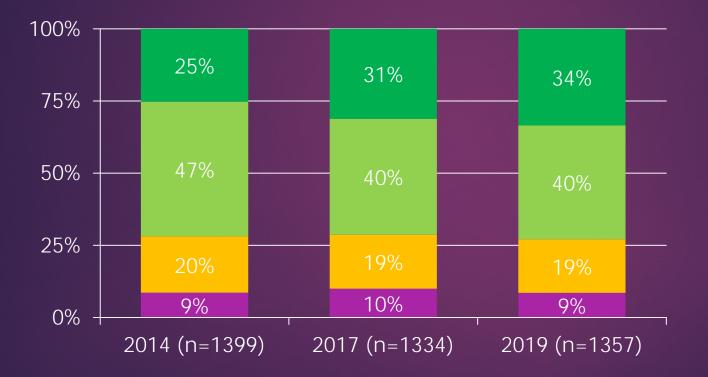

- Police visibility within neighborhoods
 - No significant changes
- Experiences with crime
 - Reduction in proportion of residents reporting 1+ recent instance of victimization
- Perceptions of police conduct
 - Perceptions of compassion shown by police during recent calls for help have improved
 - No change in perceived legitimacy of police stops
- Resident race

Veiahborhood

- Improved perceptions of compassion across white and black residents
- Those with no recent contacts look to others like them to form their opinions
