## 5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached via email.

Materials, all exterior components will be replaced/repaired with matching material (ie. wood siding exchanged for wood siding, wood shake for wood shake, etc)

## Exterior:

- 1. Repair/replace all siding (wood) as necessary to produce a clean and functional exterior wall. Replace minimal amount of cedar shake to allow for clean/respectable/uniform appearance and paintability.
- 2. Repair/replace old English gutters by relining with metal, or complete replacement as necessary ensuring to match general/original profile. Depending on the extent of rot, we may elect to go with period-relevant, galvanized gutters hung on exterior of roofline if allowable (simpler, easier to maintain, less likely to allow similar deterioration in the future)
- 3. Repair and refinish front porch steps and porch + porch roof around leaking downspout.
- 4. Repair/replace storms to match style of originals
- 5. Repair/replace/remove drip edges, window sills, and window frames as necessary to preserve building and siding.
- 6. Repaint building with three/four tone cream(window frames/windows,trim), black(possibly, for windows only), blue/green taupe (siding), red accent lines (similar to original)
- 7. Replace/repair basement windows with single panes (where frames still exist) or glass block where boarded up.
- 8. Powerwash and repaint brick (already painted and moldy in spots) fix grading to extend life of exterior and interior original foundation.

Into	rıc	۱r.
Inte	ıις	и.

1. General turn with p	paint, refinish floor where s	ensical, new flooring. Ne	ew AC units as necessary (x3)
Minor drywall work (w	here old drywall repairs ar	re failing - peeling tape).	1948-1950 units.
