

To Whom it May Concern;

I have worked with Chief Aaron Lipski in several capacities. One as a private citizen. Chief Lipski saved my family on two occasions from CO poisoning. He personally came on his own time after the first incident and helped us set up CO detectors. Those detectors alerted us about the second incident. After the second incident he taught us what a well lit flame on a stove looked like then made us get a new stove. He also helped us when my 8 month old baby bumped her head. He made sure she was healthy and aware which made us feel safe. Lipski was extremely helpful at community and school events. He made sure the community and school events were always serviced by his crew. Over 800 students received adequate fire safety training by amazing friendly fire fighters and you served over 800 kids. During community events he made sure families were provided with information about fire safety as well as set up tours of the Survive Alive house. Chief Lipski is well respected by his crew and fellow fire fighters. He is not only a superhero, but a teacher and a leader. I have know him for a long time and watched him move up the ranks while maintaining the same positive, caring, humble and kind attitude. In today's society with all the social issues and inequality, Aaron Lipski is the perfect person to build back our great community by bridging those gaps and making everyone see how excellent leaders in high places see everyone as human and equal. There is no better person to serve as our fire Chief.

Humbly Yours,

Angela Robinson
