..Analysis

This ordinance makes various revisions to the zoning code, including:

1. Changing the use classification of animal services uses in the industrial-office (IO) zoning districts from prohibited use to limited use.
2. Making personal instruction schools a permitted use in the industrial-mixed (IM) zoning districts (they are currently a special use).
3. Defining a new land use term, “adult day care”.
4. Establishing the use classification of adult day care in each zoning district.
5. Creating other zoning regulations for adult day care, distinct from those for (child) day care centers.
6. Eliminating the spacing requirements for day care centers from alcohol beverage establishments.
7. Providing additional descriptive and clarifying details and regulations for various types of signs.

**2. NUMBER OF SPACES.**

b-4-a. The use is located in the area bounded by Capitol Drive on the north, Lincoln Avenue on the south, Lake Michigan on the east and 43rd Street/Sherman Boulevard on the west.

b-4-b. The use is within 1,000 feet of any regularly scheduled bus stop providing local public bus service.

b-4-c. The use is within 1,320 feet of a bus station served by a designated bus rapid transit route offering high-frequency service.

Part 10. Section 295-403-3-a of the code is amended to read:

**3. STANDARDS OF DESIGN.**

a. Dimensions. Only individual letters or symbols may be internally illuminated. This type of sign includes, but is not limited to: letters or symbols cut from an opaque panel such as metal; pin-set letters where individual letters may be back-lit, carved entablature-type signs and other general individual-letter, non-illuminated signs. Signs of this type are commonly referred to as “monument signs.” >>A carved, painted board or an entablature-type face is considered a type A sign and may be externally lit by focused lighting that does not create glare or illumination beyond the property line.<<

Part 13. Section 295-407-2-b-1-d of the code is created to read:

b-1-d. Mounted to Fence. A sign mounted to a fence shall be considered a freestanding sign. However, a fence-mounted sign may not exceed 6 square feet in size, regardless of district maximums for freestanding signs. The area of the fence-mounted sign shall be counted towards the maximum sign area allowed per street frontage for the district.

Part 14. Section 295-407-2-b-2-a of the code is repealed and recreated to read:

**b-2. Wall Signs.**

b-2-a. Type A Wall Signs; General. A type A wall sign includes, but is not limited to: individual raised letters and symbols, sometimes considered pin-set; a carved entablature-type sign; a general individual-letter, non-illuminated sign; a carved or painted board sign; or a box-cabinet, opaque-face plate panel, such as metal material, where letters or symbols are cut out of the panel. The letters in the panel shall have at least one-half inch of extrusion. A type A wall sign does not include signage with a face plate of plastic, acrylic or similar material, even where the plastic has an opaque background.

Part 15. Section 295-407-2-b-2-b to d of the code is renumbered 295-407-2-b-2-d to f.

Part 16. Section 295-407-2-b-2-b and c of the code is created to read:

b-2-b. Type A Wall Signs; Mounting. Type A signage is generally attached to a flat, opaque wall surface and shall not cover window openings or building façade details such as corbelled brick details, cornices, window sills or lintels, or similar surface variation. A sign may be mounted from a soffit of a building recess and hung down in front of transom windows or wall below the soffit. On glass curtain wall building sections, signage shall not be placed over vision glass in the required glazing area, but may be coordinated with the façade in opaque spandrel sections, upper transoms and similar conditions. Individual letters may be mounted to a back channel or cabinet that does not exceed an area equal to an additional 30% of the total area permitted for signage.

b-2-c. Type A Wall Signs; Lighting. Only individual letters or symbols may be internally illuminated. Pin-set letters may be internally back-lit. A carved entablature-type sign, individual-letter sign or board sign may be externally illuminated by a focused spotlight or goose-neck-type fixture so that illumination does not create glare or excess light spill beyond the wall on which the sign is mounted. Where an opaque metal face plate is used in a cabinet-type box, internal illumination may only glow through cut-out letters and symbols. Decorative lighting elements, such as halo-lit layers of the mounting cabinet, and other decorative individual lights, such as perimeter lights, are permitted.

Part 17. Section 295-407-2-b-2-d of the code is amended to read:

b-2-d. Type B Wall Signs. A type B wall sign is one with a display area that has a background that is designed as an integral part of the sign. This type of sign is typically a plastic-panel-faced box sign. A permanent banner sign with a display area that is parallel to the building façade is also included in this category. Other types of wall signs which do not have the characteristics of a type A sign, including but not limited to ~~[[board signs and]]~~ painted-on wall signs, are included in this category. Such wall signs shall be attached only to flat, opaque wall surfaces.

Part 18. Section 295-407-2-b-4-a and b of the code is amended to read:

b-4. Projecting Signs.

b-4-a. Type A Projecting Signs. A type A projecting sign is one with a display area that does not have a background that is designed as an integral part of the sign, except that a nonilluminated wood or metal board-type sign or a permanent banner sign shall be considered a type A projecting sign. Only individual letters or symbols may be internally illuminated. This type of sign includes, but is not limited to: letters or symbols cut from an opaque panel such as metal; pin-set letters where individual letters are back lit; non-illuminated pin-set letters. If individual letters are used on the sign, they shall be applied to or affixed to a projecting board or to a cabinet not more than 12 inches thick in order for the sign to be considered within the type A category. >>A carved or painted-board projecting sign is considered a type A sign and may be externally lit by focused lighting that does not create glare or illumination beyond the property line. Decorative lighting

elements, such as halo-lit layers of the mounting cabinet and other decorative individual lights, such as perimeter lights, shall be permitted.<<

b-4-b. Type B Projecting Signs. A type B projecting sign is one with a display area that has an >>internally<< illuminated overall background. This type of sign is typically a plastic-panel-faced box sign. Other types of projecting signs which do not have the characteristics of a type A sign are included in this category.
