The covered walk shall be supported by the building and two vertical supports near each corner closest to the curb along each side of the covered walk. Each vertical support nearest the curb is centered approximately 2 feet from the curb line. There is an opening 6 feet wide between the vertical supports, which parallels the curb. The minimum vertical clearance between the skirt of the covered walk and the sidewalk below is 8 feet.

Said covered walk shall generally be constructed in accordance with the policies set forth in Common Council Resolution File Number 62-1211-a, adopted July 24, 1962. The covered walk frame shall be designed and supported to withstand snow and other loads of not less than 25 pounds per square foot applied in any direction. No guy wires, brackets or diagonal braces shall be permitted lower than 8 feet above the sidewalk level. The covering shall be of approved material.

All fixtures and materials for illumination of the covered walk shall be indicated on the construction plans and approved prior to installation. No sign or advertising device shall be hung from, attached to, printed or painted on any part of the covered walk. The name, street number, or character of the business may be indicated only on the vertical portion of the covering and shall not exceed 8 inches in height.

3. To install and maintain nine private light fixtures with appurtenant electrical conduit mounted to walk down area wall, which is centered approximately 5 feet 6 inches east of the westline of North Broadway. The light fixtures, which are mounted approximately 6 inches below the adjacent sidewalk grade, are spaced at varying distances between the northline of East Michigan Street and the north property line located 180 feet to the north.
4. To install and maintain a cigarette butt disposal bin in the west, 20-foot wide sidewalk area of North Broadway.
