Part 20. Section 295-403-2-b-0 and 1 of the code is amended to read:

**295-403. Parking.**

**2. NUMBER OF SPACES.**

b. Adjustment to Number Required. ~~[[The]]~~ >>For any use except one- or 2-family residential, the<< number of parking spaces required for a particular use may be reduced in accordance with the following credits:

b-1. ~~[[For any use except one- or 2-family residential, one]]~~ >>One<< space for each off-site parking space which is owned or rented by the property or business owner for the purpose of providing parking to the use in question. Such off-site spaces shall be located within 700 feet of the use, as measured by using the shortest pedestrian route from the nearest corner of the parking facility to the main public entrance of the use served. For a non-residential use, the off-site spaces shall not be located on a site containing a wholly residential use. Off-site parking spaces shall also conform with

the regulations of the zoning district in which they are located.

Part 21. Section 295-405-1-b-4 and 8 of the code is amended to read:

## **295-405. Landscaping.**

### **1. PERIMETER LANDSCAPING AND EDGE TREATMENTS.**

#### **b. Types of Landscape Treatment.**

b-4. Type “D” Landscaping (Motor Vehicle Sales Lot Landscaping). This type is primarily intended for application along street frontages of motor vehicle sales and display lots. It requires regularly-spaced trees and continuous, lower-height base shrubs. Unlike the type A requirement, base shrubs need only grow to a height of 2 feet. ~~[[This type does not require fences or walls. Fences are allowed, but not required.]]~~ >>This type requires fences or walls in the LB2 district, but in all other districts fences and walls are optional.<< Plantings in the low-level and high-level zones shall create a continuous edge of plants, while the eye-level zone shall be kept mostly open, consistent with the standards of par. c-5, to allow for surveillance between parking lots and streets.

b-8. Type “H” Landscaping (Residential Buffers). This type is primarily intended to surround or visually separate parking lots and structures from residential uses. Examples of items to be screened with type “H” landscaping include parking lots for churches and schools, apartment buildings and non-residential uses, as well as principal-use parking lots and structures. This type of landscaping relies primarily on opaque fencing, but also requires trees and shrubs when the parking lot or structure provides parking for uses other than ~~[[residential, educational]]~~ >>single-family or two-family dwellings, educational uses<< or community-serving uses. Opaque fencing provides screening from the ground to at least 6 feet above grade. Tree plantings in the eye-level and high-level zones shall create a continuous edge of plants that completely obscures the parking area from the adjacent residential use or uses. A parking structure may achieve this standard if the required opaque fence/wall is incorporated into the design of the structure itself.

Part 22. Section 295-405-1-c of the code is amended to read:

c. Requirements by Landscaping Type. Table 295-405-1-c contains the fence/wall and landscaping requirements for each of the landscaping types described in par. b. Prior to issuance of any permit >>or certificate of occupancy<< for a use >>or change of use<< for which perimeter landscaping and edge treatments are required by this chapter, a landscaping and screening plan with specifications and an installation schedule shall be submitted to the commissioner for approval. When interpreting the requirements of table 295-405-1-c, the following standards shall apply:

Part 23. Section 295-415-4-b-1 of the code is amended to read:

## **295-415. Nonconformities.**

### **4. NONCONFORMING STRUCTURES.**

#### **b. Enlargements, Alterations or Relocation.**

b-1. A nonconforming structure occupied by only conforming uses may be enlarged or structurally altered provided that the enlargement or structural alteration ~~[[conforms with the setback requirements and all other applicable regulations of the district in which it is located and]]~~ does not increase the existing dimensional nonconformity of the structure >>or create additional nonconformities<< .
