ALD. DUDZIK

An ordinance relating to snow parking regulations.

101-26.5 rc

Currently, on designated streets, vehicles may be parked on both sides of the street day or night, except when snow has accumulated to a depth of 4 inches or more. The code requires that on designated streets when snow has accumulated on the street to a depth of 4 inches or more, vehicles may be parked on one side of a designated street. This ordinance requires that for a street designated "no parking when snowfall 4" or more," the depth of snow accumulation shall be determined at the sanitation district yard in which a street is located for the purposes of effectiveness and efficiency of snow removal operations.

The Mayor and Common Council of the City of Milwaukee do ordain as follows:

Part 1. Section 101-26.5 of the code is repealed and recreated to read:

**101-26.5. Snow Parking Regulations - 4 or More Inches.**

**1. PURPOSE.** The common council finds that certain streets experience high demand for parking which restrict the accessibility of snow plows to the curb line. The common council further finds that it is necessary to prohibit parking until the snow has been removed on one side of a street where a sign indicating “no parking when snowfall 4” or more,” is posted in order to increase the effectiveness and efficiency of snow removal operations.

**2. REGULATIONS.** a. On designated streets, vehicles may be parked on both sides of the street day or night, except when snow has accumulated to a depth of 4 inches or more.

b. For a street designated “no parking when snowfall 4” or more,” depth of snow accumulation shall be determined at the sanitation district yard in which a street is located.

c. Designated streets are to be found in the common council proceedings, the official record on file in the city clerk's office, and the code on file in the legislative reference bureau.

**3. COMPLIANCE WITH OTHER RESTRICTIONS.** Vehicles parked in compliance with sub. 2 shall also comply with the provisions of s. 101-27-1-a-1.
