This ordinance defines a "wind energy system" as equipment that converts and then stores or transfers energy from the wind into usable forms of energy, as defined by s. 66.0403(1)(m), Wis. Stats. This equipment includes any base, blade, foundation, generator, nacelle, rotor, tower, transformer, vane, wire, inverter, batteries or other component used in the system.

This ordinance also differentiates between a "small wind energy system" and all other types of wind energy systems. The former is a wind energy system that is used to generate electricity, has a nameplate capacity of 100 kilowatts or less and has a total height of 170 feet or less, where "total height" means the vertical distance from ground level to the tip of a wind generator blade when the tip is at its highest point. Any wind energy system other than a small wind energy system is classified as a "power generation plant," a land use term currently defined in the zoning code.

In addition, this ordinance classifies a small wind energy system as a limited use in all residential districts, with the limited use standard being that the total height of the wind energy system shall not exceed the district height limit by more than 10 feet. In all other zoning districts, a small wind energy system shall be a permitted use.

The ordinance also sets forth requirements for small wind energy systems relating to:

1. Setbacks from public right-of-way, overhead utility lines and property lines.
2. Preventing unauthorized access to a small wind energy system.
3. The location of electrical wires associated with a small wind energy system.
4. The use of artificial lighting.
5. The color and finish of a wind tower or generator.
6. Types of signs permitted.
7. Compliance with applicable state construction and electrical code provisions.
8. Compliance with the Wisconsin public service commission's Rules for Interconnecting Distributed Generation Facilities.
9. Removal of an abandoned small wind energy system.

Finally, the ordinance provides that the requirements and procedures for a meteorological tower -- i.e., a tower used to monitor or transmit wind speed and wind flow characteristics over a period of

time for either instantaneous wind information or to characterize the wind resource at a given location
- are identical to the requirements and procedures for small wind energy systems.

Part 1. Section 295-201-459-0 of the code is amended to read:

295-201. Definitions.

459. POWER GENERATION PLANT means a facility that converts one or more energy sources, including but not limited to water power, >>wind power,<< fossil fuels, nuclear power or solar power, into electrical energy or steam. >>This term does not include a small wind energy system.<< A power generation plant may also perform either or both of the following:

Part 2. Section 295-201-612 of the code is created to read:

612. SMALL WIND ENERGY SYSTEM means a wind energy system that is used to generate electricity, has a nameplate capacity of 100 kilowatts or less and has a total height of 170 feet or less, where “total height” means the vertical distance from ground level to the tip of a wind generator blade when the tip is at its highest point. A wind energy system that has a nameplate capacity of more than 100 kilowatts or a total height of more than 170 feet shall be classified as a power generation plant.

Part 3. Section 295-201-690 of the code is created to read:

690. WIND ENERGY SYSTEM means equipment that converts and then stores or transfers energy from the wind into usable forms of energy, as defined by s. 66.0403(1)(m), Wis. Stats. This equipment includes any base, blade, foundation, generator, nacelle, rotor, tower, transformer, vane, wire, inverter, batteries or other component used in the system.

Part 4. Section 295-203-15-g-0 of the code is amended to read:

295-203. Use Definitions.

15. UTILITY AND PUBLIC SERVICE USES.

g. “Power generation plant” means a facility that converts one or more energy sources, including but not limited to water power, >>wind power,<< fossil fuels, nuclear power or solar power, into electrical energy or steam. >>This term does not include a small wind energy system.<< A power generation plant may also perform either or both of the following:

Part 5. Section 295-203-15-h of the code is created to read:

h. “Small wind energy system” means a wind energy system that is used to generate electricity, has a nameplate capacity of 100 kilowatts or less and has a total height of 170 feet or less, where “total height” means the vertical distance from ground level to the tip of a wind generator blade when the tip is at its highest point. A wind energy system that has a nameplate capacity of more than 100 kilowatts or a total height of more than 170 feet shall be classified as a power generation plant.

Part 6. Section 295-414 of the code is created to read:

295-414. Small Wind Energy Systems. 1. GENERAL REQUIREMENTS. A small wind energy system shall comply with the use regulations of the applicable zoning district and with the following requirements:

a. Setbacks. The wind tower for a small wind energy system shall be set back a distance equal to its total height from:

a-1. Any public right-of-way, unless written permission is granted by the governmental entity with jurisdiction over the road.

a-2. Any overhead utility line, unless written permission is granted by the affected utility.

a-3. Any property line abutting property that is residentially zoned, unless written permission is granted by the owner of the abutting property.

b. Access. b-1. All ground-mounted electrical and control equipment shall be labeled or secured to prevent unauthorized access.

b-2. The tower shall be designed and installed so as to not provide step bolts or a ladder readily accessible to the public for a minimum height of 8 feet above the ground.

c. Electrical Wires. All electrical wires associated with the small wind energy system, other than the grounding wires, wires necessary to connect the wind generator to the tower wiring and wires necessary to connect the tower wiring to the disconnect junction box, shall be located underground.

d. Lighting. The wind tower and generator shall not be artificially lighted unless such lighting is required by the federal aviation administration.

e. Appearance, Color and Finish. The wind generator and tower shall remain painted or finished the color or finish that was originally applied by the manufacturer, unless a different color or finish was approved by the commissioner at the time of permit issuance.

f. Signs. No signs shall be permitted other than signs identifying the manufacturer, installer or owner, appropriate warning signs, and one sign with a display area not exceeding 18 square feet that is used solely for educational or acknowledgement purposes..

g. Code Compliance. The small wind energy system, including the tower, shall comply with all applicable state construction and electrical code provisions.

h. Utility Notification And Interconnection. If the small wind energy system is connected to an electric utility, it shall comply with the public service commission of Wisconsin's Rules for Interconnecting Distributed Generation Facilities.

2. ABANDONMENT. a. Notice of Abandonment. A small wind energy system that is out of service for a continuous 12-month period shall be deemed to have been abandoned. The commissioner of neighborhood services may issue a notice of abandonment to the owner of a small wind energy system that is deemed to have been abandoned. The owner shall have the right to respond to the notice of abandonment within 30 days of receipt of the notice. The commissioner shall withdraw the notice of abandonment and notify the owner of the withdrawal if the owner provides information that

demonstrates the small wind energy system has not been abandoned.

b. **Removal of Abandoned System.** If the small wind energy system is determined to be abandoned, the owner of a small wind energy system shall remove the wind generator from the tower at the owner's sole expense within 3 months of receipt of the notice of abandonment. If the owner fails to remove the wind generator from the tower, the commissioner of neighborhood services may pursue a legal action to have the wind generator removed at the owner's expense.

3. METEOROLOGICAL TOWERS. A meteorological tower is a structure, including a tower, base plate, anchors, guy cables and hardware, anemometers, wind direction vanes, booms to hold equipment, anemometers and vanes, data logger, instrument wiring and telemetry devices, that is used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. A meteorological tower shall be permitted under the same standards and removal requirements as a small wind energy system.
